Constructive Commutative Algebra: Projective Modules Over Polynomial Rings and Dynamical Grobner Bases

Filesize: 4.27 MB

Reviews

It in a of the most popular publication. It really is filled with knowledge and wisdom Its been designed in an exceedingly straightforward way and it is merely soon after i finished reading this pdf by which actually transformed me, affect the way in my opinion. (Gerardo Rath)

CONSTRUCTIVE COMMUTATIVE ALGEBRA: PROJECTIVE MODULES OVER POLYNOMIAL RINGS AND DYNAMICAL GROBNER BASES

COMINICAD PDF

Springer International Publishing AG. Paperback. Book Condition: new. BRAND NEW, Constructive Commutative Algebra: Projective Modules Over Polynomial Rings and Dynamical Grobner Bases, Ihsen Yengui, The main goal of this book is to find the constructive content hidden in abstract proofs of concrete theorems in Commutative Algebra, especially in well-known theorems concerning projective modules over polynomial rings (mainly the Quillen-Suslin theorem) and syzygies of multivariate polynomials with coefficients in a valuation ring. Simple and constructive proofs of some results in the theory of projective modules over polynomial rings are also given, and light is cast upon recent progress on the Hermite ring and Grobner ring conjectures. New conjectures on unimodular completion arising from our constructive approach to the unimodular completion problem are presented. Constructive algebra can be understood as a first preprocessing step for computer algebra that leads to the discovery of general algorithms, even if they are sometimes not efficient. From a logical point of view, the dynamical evaluation gives a constructive substitute for two highly nonconstructive tools of abstract algebra: the Law of Excluded Middle and Zorn's Lemma. For instance, these tools are required in order to construct the complete prime factorization of an ideal in a Dedekind ring, whereas the dynamical method reveals the computational content of this construction. These lecture notes follow this dynamical philosophy.
