RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 60 pages. Original publisher: Research Triangle Park, N. C. : U. S. Environmental Protection Agency, Office of Air Quality Planning and Standards, 2006 OCLC Number: (OCoLC)123023468 Subject: Environmental policy -- North Carolina -- Charlotte Region. Excerpt: . . . impacts of permitted municipal and industrial dischargers. Most of the monitored reservoirs, including municipal drinking water supplies, have excessive algal growth and associated concerns with dissolved oxygen and pH. These problems were caused by low flow, sedimentation, nutrients, and toxicants. The majority of streams in the SEQL area are on the Clean Water Act section 303 (d) list of water bodies not meeting quality standards or which have impaired uses, either for specific pollutant such as fecal coliform, or for biological impairment. Total Maximum Daily Loads or TMDLs are required on some, but not all, of these waters; the extent to which they are in place varies greatly. Until the recent past, the region had no water quantity issues. However, a severe five-year drought several years ago nearly depleted the water supplies of a number of cities. High-growth counties that do not border a river...

Reviews

The book is great and fantastic. It is probably the most remarkable pdf i have got read through. You can expect to like the way the article writer compose this ebook.
