This is because most of us have a mindset that fats and oils in our food are definitely items to be avoided by any sensible person who is bothered about the state of his health. Well, the answer is that that we have become so obsessed about weight loss and weight gain, that we have forgotten one main medical truth. Our body cannot do without fat, and that is the reason why any diet which talks about 0 fat is not going to be helpful to our bodies. That is because our bodies are genetically and naturally programmed to have a layer of subcutaneous fat, which we normally call cellulite. That is to protect the inner organs from any sort of damage from external sources, and it is between the skin, the muscle and the inner organs. The vulnerable inner organs, especially in the stomach region are protected with this layer - the obese layer you call a beer belly - and that is why any fatty item you eat is going to be observed by your body and the fatty cells turned into protective cellulite. For millenniums, this fatty layer was considered to be a storehouse of energy, from which the body could get extra nutrition. When...
