OCLC Number: (OCoLC)244172990 Subject: Water quality management -- Ohio. Excerpt: . . . 3. 3 Project Review Project and field reviews are conducted periodically by OWSC management, technical advisors, or discipline specialists to ensure compliance with the QA QC plan or project workplan. Project reviews are also used to ensure that data collection, analysis, and reporting are being done in accordance with broader OWSC policies and requirements. Quality-assurance activities with respect to project reviews are outlined in the next section. 3. 3. 1 Review Schedules Regularly planned reviews ensure that water-quality programs or projects are conducted efficiently to produce quality products on time. Informal reviews are part of ongoing quality assurance, whereby problems and related issues are addressed as they arise. Technical reviews are needed for most projects. The type and frequency of technical reviews depend on the size and duration of the project and project objectives. For most water-quality projects, the OWSC implements a review schedule for evaluating the technical development and progress of project activities at 10-, 40-, 70-percent (10 40 70) project-completion milestones. For small or routine projects or projects of short duration, 10 40 70 technical reviews may be impractical or unnecessary; instead, reviews are done as requested by the project chief or required by the supervisor. For projects in which the cooperator is heavily involved in project activities, such as analytical microbiology projects, quarterly conference calls or meetings with the cooperator may serve as a technical review. The supervisor and QW Specialist will require...
