

Transactions and Proceedings Volume 33

By Royal Society Of New Zealand

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 226 pages. Dimensions: 9.7in. x 7.4in. x 0.5in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1901 edition. Excerpt: . . . the petiole gradually straightens, until by the time the lamina has expanded It is quite straight. After growth of forty-four days the cotyledons attained a length (including petiole) of 3-6 cm. , and the 1st leaf a length of 2-31cm. , with lamina 6mm. and petiole 2-25 cm. While this development of cotyledons and leaf is proceeding, the root, in an early stage pale and translucent, has now become a deeply descending thick tap-root containing an abundance of food-material, which has been here stored up at the expense of rapid growth and development Of stem and leaves. After about two and a half months growth the roots are out of the bottom of the pot, 92 cm. in depth, in which the seed was sown, and are from 1 mm. to 1-5 mm. in diameter above. The 2nd leaf issues from the protecting sheath at...

Reviews

A very wonderful pdf with perfect and lucid explanations. This can be for those who statte that there had not been a worth reading. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Mr. Stone Kunze**

This created pdf is excellent. We have read through and i also am sure that i am going to going to study yet again yet again in the future. You will not truly feel monotony at at any time of your time (that's what catalogues are for concerning should you check with me).
